DETAILED ACTION

Current Status

1. Claims 1-77 are pending in the application.

Lack of Unity

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- **Group 1**. Claims 1-27, 32-38, 69, 76 and 77, drawn to compounds, their composition, process for making the compounds and method of using the compounds, classified in class 514, subclass 355+.
- **Group 2**. Claims 27-31 and 39 drawn to a conjugate, its composition and method of treatment, classified in class 514, subclass 355+.
- **Group 3**. Claims 40-54 drawn to a method of reducing or eliminating the effects of ionizing radiation, classified in class 514, subclass 355+.
- **Group 4**. Claims 55-68 drawn to a method of protecting an individual from cytotoxic side effects, classified in class 514, subclass 339+.
- **Group 5**. Claims 70 and 75 drawn to a compound of formula II and a process of making the same, classified in class 564, subclass 355+.
- **Group 6**. Claim 71 drawn to a compound of formula II and a process of making the same, classified in class 546, subclass 315+.

Group 7. Claim 72 drawn to a process of making the compound of formula Iz, classified in class 568, subclass 63+.

Group 8. Claim 73 drawn to a process of making the compound of formula IV and a process of making the same, classified in class 546, subclass 315+.

Group 9. Claim 74 drawn to a process of making the compound of formula V and a process of making the same, classified in class 546, subclass 315+.

The inventions listed as Group 1 - Group 9 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group 1 is drawn to compounds, their composition, process for making the compounds and method of using the compounds, Group 2 is drawn to a conjugate, its composition and method of treatment while Groups 3 and 4 are drawn to different methods of treating diseases. Group 5 is drawn to a compound of formula II and a process of making the same while Groups 6-9 are drawn to different methods for making different compounds. These nine groups of invention are different from each other. Therefore, there is no special technical feature for the compounds, the processes of making these compounds or the different fields of application of the compounds. Also there is no unity of invention.

There is no special technical feature, which unites the groups. But even if there were a special technical feature there must be unity of invention also. Under 37 CFR 1.475

Application/Control Number: 10/574,993 Page 4

Art Unit: 1621

(a) An international and a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention"). Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

- (b) An international or a national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories:
- (1) A product and a process specially adapted for the manufacture of said product; or
- (2) A product and a process of use of said product; or
- (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or
- (4) A process and an apparatus or means specifically designed for carrying out the said process; or
- (5) A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process.

The above groups 1-9 together do not meet the requirement of unity of invention as given above in (1) -(5).

Application/Control Number: 10/574,993

Art Unit: 1621

A telephone call was made to Daniel Monaco on 1/16/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chukwuma O. Nwaonicha whose telephone number is 571-272-2908. The examiner can normally be reached on Monday thru Friday, 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K. Page can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
